The safety procedures included with each activity were written to assist facilitators in conducting the *MicrobeWorld Activities* with participants from their community. While every effort has been made to anticipate questions and situations that could arise, the safe implementation of these activities must depend on the good judgment of the facilitators and is the responsibility of the local institution. We suggest that facilitators consult state or local safety manuals or textbooks for additional information.

NABT recognizes the pervasive social phenomenon of litigation with respect to even the most unfounded claims. For that reason, NABT disclaims any legal liability for claims arising from use of these activities. This information has been provided to facilitators and institutions as a service to the profession and we provide this material only on the basis that NABT has no liability with respect to its use. Responsibility for use of any of this information is assumed by the local institution.

NABT believes that under the guidance of a properly trained and responsible facilitator all of the *MicrobeWorld Activities* can be conducted safely.
